About us

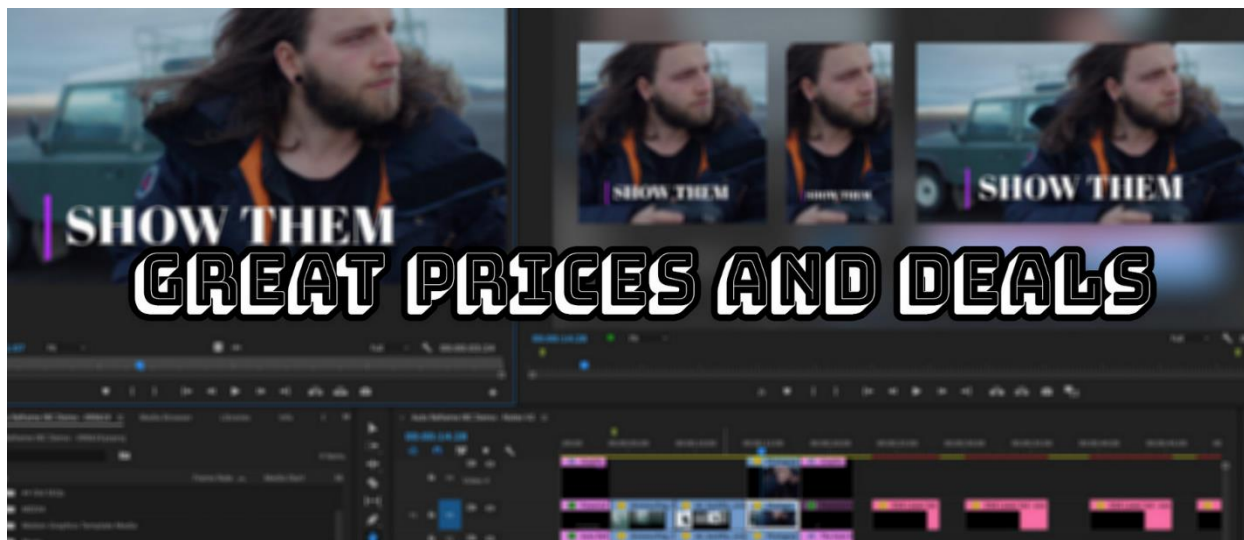

Welcome to our editing company. We are from Serbia and we have been editing videos for quite some time now. We started it as a hobby and now we are doing it professionally.

We are mostly doing gaming videos at the moment, but we are looking to improve on some areas and we are trying to learn a lot new stuff for example car commercials etc.

In terms of programs we are using adobe premiere pro for editing, adobe photoshop for thumbnails and some other programs that help us create content for the customers.
